

### Products

- Vitamine C

Sodium ascorbate

Vitamine C stimulates the collagen synthesis. It is antioxidant, neutralises free-radicals and provides photo-protection.

- Vitamine A Palmitate

Retinyl Palmitate

Vitamine A is know as an active ingredient in the skin queratinisation process. This makes it optimalas ingredient in anti-acné preparations and in products for damaged skin.

- Vitamine E

Di-a-tocopherol and tocopherol acetate Biologic antioxidant, protects cellular membranes and prevents de oxidation of the essential fatty acids present in the skin.

- Lactoferrine

Lactoferrine

Prevention of skin pigmentation / whitening.

- Ceramide

Ceramide II

Ceramides restore the lipidic barrier of the corneum estratus of dry and damaged skin, avoiding water loss and providing a good skin hydratation.

- Questamide H

Bishydroxyethyl Biscetyl Malonamide

Same as ceramide.

- Borage oil

Borage Officinalis

Borage Seed Oil contains important quantities of essencial fatty acids, particularly g-linoleic acid. It is recommended for the treatment of dry skin, fragile nails and atopic eczema

- Tea extract, Caffeine, Ruscus, Fucus, Ivy The sinensis, Caffeine, hedera helix, Fucus vesiculosus, Hydrocotyle asiática Anticellulitic and antigroove activity, adding up the benefits of each ingredient:

- Tea and caffeine: lipolitic action.

- Hedera and focus and hydrocotyle: prevent the formation of water deposits in the cellulitic tissue.

Some of the ingredients have also soothing and antiinflamatiry properties (i.e. fucus).

- Empty Liposomes.

Lecithine

Restoration/Protection of the celular membrane.

- Organic Silice

Methylsilanol Mannuronate

This active principle is very important in all dermatologic preparations because of its action in skin restructuring:

- Regeneration of elastic fibers.

- Modification of the skin permeability.

- Keeping the tissues elasticity.

TT-somas (Spanish version)

Lecithine

A preparation liposome base for its use in a great number of scientific developments, skillful formulations, pharmaceutical and cosmetic.
